Summary

IDAAN published its weekly maintenance schedule for water treatment plants nationwide for 5-11 October 2026. In Chiriqui the affected plants are Los Algarrobos (Barú) and Santa Marta (Dolega) — the Dolega plant is close to Boquete, so some service disruption is possible in nearby areas.

Details (summary of the article)

According to Telemetro, IDAAN announced its calendar of scheduled maintenance works at water treatment plants around the country for the week of 5 to 11 October 2026. In Chiriqui province the plants listed are Los Algarrobos in Barú and Santa Marta in Dolega. Other provinces affected include Los Santos (Llano de Piedra, Macaracas, Rufina Alfaro), Herrera (Roberto Reyna), Bocas del Toro (Nuevo Paraíso, Quebrada Nigua), Panamá Oeste (Chame), Coclé (Natá, Penonomé, Capellanía) and Panamá Este (Chepo). No specific plant in Boquete district was listed, but maintenance usually means temporary low pressure or suspension of supply in the served areas, so residents on IDAAN service near Dolega should store water. Exact hours were not given in the report; details are in IDAAN's own announcement.
