Summary

Panama's public services regulator ASEP will apply the alternative frequency request procedure to applications approved between 14 and 18 September 2026; interested concessionaires may file from 9 October to 9 November 2026.

Full text (English)

NOTICE. The National Authority of Public Services (ASEP) will submit, as required by regulation, to the alternative frequency application procedure all approved applications filed in the period from 14 to 18 September 2026.

The list of these frequencies may be obtained at the Concessionaire Service Unit (UAC) of the National Telecommunications Directorate, on the first floor of the Office Park building, Vía España and Fernández de Córdoba, or through ASEP's website: www.asep.gob.pa
Concessionaires interested in taking part must enter their applications through the Telecommunications Administration System (SATEL) and present them to the UAC between 9 October and 9 November 2026.

Concessionaires are reminded that this procedure costs one hundred balboas (B/.100.00), payable when the application is filed by certified or cashier's check made out to the National Authority of Public Services, and that they must be current in payment of the regulation fee and the annual frequency-use levy.

Zelmar Rodríguez de Massiah, General Administrator.
