Summary

Naturgy says heavy rain and storms around the country may delay restoration of electricity in areas still affected after the earthquake, since electrical work cannot be done safely in storms.

Full text (English)

Statement, Panama, Monday 12 October 2026. We inform our customers that, due to the heavy rains and storms occurring in various parts of the country, work to restore electricity supply in sectors still affected could be delayed. For safety reasons, some activities must be temporarily suspended while these weather conditions persist, as electrical work cannot be carried out safely during heavy rain and storms. Work resumes as soon as conditions allow, safeguarding the safety of our workers and the community. Our teams remain deployed and continue working to restore power to all customers affected by the earthquake. We reiterate our commitment to restoring service as quickly as possible, always prioritising people's safety.
