Summary

Telemetro reports the ATTT has kept the David vehicle registry (RUVM) office closed after quake damage found in a safety inspection; all registry procedures are being handled at the Dolega and Boquerón branches in Chiriquí until further notice.

Details (summary of the article)

The Land Transit and Transport Authority (ATTT) announced on Tuesday 13 October that public service at the Motor Vehicle Registry (RUVM) in David, Chiriquí, remains suspended after a preventive inspection by the David Municipality's works department found deterioration and damage to the building's finishes following the 9 October earthquake. The suspension is meant to avoid risks to staff and users. While it lasts, all vehicle registry procedures will be handled at the Dolega and Boquerón branches in Chiriquí: vehicle registration, data updates, reinstatement of vehicles, and transfer or change of municipality. Users must bring the required documents for each procedure and meet the set conditions, including verification of the vehicle's geographic location where applicable, so records stay up to date. Reported by Telemetro.
