Summary

SINAPROC reported flooding, landslides and structural collapses from the rains of Tuesday 13 October in Chiriqui, Panama, Colon and Azuero; in Chiriqui a house flooded in La Curtiembre, David Este, and a young man went missing in a river in Gualaca.

Details (summary of the article)

SINAPROC's national emergency operations centre said it responded to damage from the recent rains in the provinces of Chiriqui, Panama, Colon, the Azuero region and West Panama. Reports included flooded homes, landslides, three structural inspections and structural collapses, prompting response teams to carry out assessments. In Chiriqui a house was flooded in the La Curtiembre sector of David Este, behind the David cemetery. In Panama province (Pedregal) a structure collapsed in Villa Lobos and a landslide occurred at Altos del Rio; flooding hit Tocumen, Juan Diaz, Las Mañanitas, Chilibre, Panama Viejo, Santa Elena and San Miguelito, with more than 10 landslides mainly in San Miguelito, and streams and rivers overflowed in the capital. In Colon three structural inspections were carried out (Barrio Sur, Miguel de la Borda in Donoso, and Avenida Margarita in Cristobal) plus a collapse in the Colon Free Zone. A young man was also reported missing in a river in Gualaca, Chiriqui. SINAPROC continues operational coordination and also continues inspections following the 9 October earthquake, with volunteers and staff deployed to assess damage and needs.
