Summary

The Boquete Mayor's Office Aqueduct Department is repairing a break in the 10-inch pipe supplying the Alto Boquete drinking water plant, at the elbow near a hydrant. Alto Boquete still has water, currently supplied from the Los Ladrillos plant while the line is restored.

Full text (English)

The Boquete Mayor's Department of Aqueducts is carrying out work to repair a break in the 10-inch pipe that supplies water to the Alto Boquete drinking plant. The damage occurred at the junction of the pipe that connects to a hydrant, so the damaged section will be replaced and a new piece installed. Important: Alto Boquete maintains its drinking water supply, as it is currently being supplied from the Los Ladrillos drinking plant. These works will allow restoration of the 10-inch line and of supply to the Alto Boquete plant. Boquete Mayor's Office - We continue working.
