Summary

SINAPROC advisory for maximum tides on Panama's Pacific coast from 3:26 a.m. Monday 26 October to 6:57 p.m. Friday 30 October, peaking at 17.1 ft (5.21 m) at 4:50 a.m. Wednesday 28 October. Combined with rain, tides could raise river levels and cause flooding in vulnerable areas.

Details (summary of the article)

SINAPROC, through the National Emergency Operations Centre, issues a prevention advisory for maximum tides on Panama's Pacific coast from 3:26 a.m. Monday 26 to 6:57 p.m. Friday 30 October 2026. Tides could reach 17.1 feet (5.21 m), highest on Wednesday 28 October at 4:50 a.m. Daily peaks: Mon 26: 3:26 a.m. 16.4 ft, 3:56 p.m. 16.0 ft; Tue 27: 4:07 a.m. 16.9 ft, 4:37 p.m. 16.4 ft; Wed 28: 4:50 a.m. 17.1 ft, 5:20 p.m. 16.4 ft; Thu 29: 5:35 a.m. 16.9 ft, 6:06 p.m. 16.1 ft; Fri 30: 6:23 a.m. 16.4 ft, 6:57 p.m. 15.5 ft. If these tides coincide with rain, river and stream levels could rise, increasing flood risk. Advice: avoid coasts, rivers and flood-prone areas at peak tide hours; follow official bulletins; do not cross rivers or flooded areas on foot or by vehicle; secure boats and loose objects; identify evacuation routes. Emergencies: 911 or COEN 520-4426/520-4429/6998-4809.
