Summary

Destino Panamá reports that the utility Naturgy is showing solidarity with and assisting families affected by the earthquake in the Azuero region.

Full text (English)

Destino Panamá reports that Naturgy, the electricity distributor that also serves Chiriquí through EDECHI, has expressed solidarity with and is supporting families affected by the earthquake in the Azuero region. The item is only a headline, so details of the aid are not given in the text available. For Boquete customers the practical relevance is limited, since the damage and relief are in Azuero, but it indicates where the company is concentrating its community response after the 9 October quake. Full details are on the Destino Panamá website.
