Summary

La Estrella de Panamá reports 20 dengue deaths nationwide, with most cases concentrated in Colón and Panama City.

Full text (English)

According to La Estrella de Panamá, dengue has caused 20 deaths in Panama so far this year. The highest numbers of cases are concentrated in Colón province and the capital city. Residents elsewhere, including Chiriquí, are reminded that dengue is mosquito-borne and that eliminating standing water around homes is the main prevention measure, especially during the current rainy period.
