Summary

The Directorate General of Administrative Career has told all state institutions to report, by Friday 30 October 2026, details of their retired or pensioned staff, amid debate over voluntary retirement proposals.

Details (summary of the article)

TVN reports that the Dirección General de Carrera Administrativa issued a circular dated 16 October 2026 requiring state institutions to submit, before Friday 30 October, information on employees who are already retired or receiving a pension. The request has caused unease among public-servant representatives because it comes while legislative proposals on voluntary retirement of civil servants are being discussed. Director Cheyla Valdés said the aim is simply to keep the public-servant database up to date and to gather data allowing an assessment of the financial impact of possible voluntary retirement measures. Public employees in Chiriquí working for state agencies may be asked for this information by their human resources offices.
