Summary

TVN reports that more than 300 homes have been damaged and roughly 1,200 people affected in Chiriquí province, following the recent earthquake and rains.

Full text (English)

A TVN video report states that more than 300 homes in Chiriquí province have been damaged and about 1,200 people are affected. The item is a short video news piece without further detail in the text provided; it follows earlier official damage assessments in the province after the 9 October earthquake and the current spell of heavy rain. Residents of Boquete district should expect continued damage assessment and assistance operations across Chiriquí.
